

Group Data Sheets for artificial nail products

Group Data Sheets for Artificial Nail Products

The logo for IKW (Industrieverband Körperpflege- und Waschmittel) consists of the letters 'IKW' in a stylized, grey, sans-serif font. The 'I' and 'K' are tall and narrow, while the 'W' is wider and shorter. There are two small blue and red marks above the 'W'.The logo for FCIO (Fachverband der chemischen Industrie Österreichs) features the letters 'FCIO' in a bold, blue, sans-serif font. The 'O' is stylized with a red and grey graphic element on its right side.The logo for SKW (Schweizerischer Kosmetik- und Waschmittelverband) shows the letters 'SKW' in a blue, sans-serif font. To the left of the letters is a graphic of three overlapping wavy lines in blue, orange, and blue.

About this brochure

Please note:

This brochure focuses on artificial nail products which are subject to the EU legal provisions on cosmetic products. Other products, as nail adhesives, files, UV lamps, disinfection agents etc. are governed by separate legal provisions such as chemicals law and are covered in this publication only for the sake of completeness. In order to provide employees in nail studios with some first support regarding safe working, some basic information is provided in the Annex of this brochure for selected products. At any rate the valid specific legal provisions governing this product must be complied with, in particular the possibly existing safety data sheets under chemicals law.

Cosmetic products are governed throughout the European Union by the requirements of the EC Cosmetic Products Regulation [Regulation (EC) No. 1223/2009]. In accordance with the definition in the EC Cosmetic Products Regulation (CPR), cosmetic products are defined as substances or mixtures intended to be placed in contact with various external parts of the human body (epidermis, hair system, nails, lips, and external genital organs) or with the teeth and the mucous membranes of the oral cavity with a view exclusively or mainly to

- cleaning them,
- perfuming them,
- changing their appearance,
- protecting them,
- keeping them in good condition or
- correcting body odours.

The manufacturers of cosmetic products are obliged to place only products on the EU market which are safe for human health (Article 3 CPR). This must be proven individually by a safety assessment and a safety report for every single cosmetic product placed on the market (Article 10 CPR). The safety report must be documented by the manufacturer or the responsible person with registered office in the EU (according to Article 4 CPR) within the framework of the statutory product information file (Article 11 CPR) and must be kept available for inspection by the competent authorities. Furthermore, the possibly claimed efficacy of the product must be evidenced and documented within the framework of the product information file.

Many substances and/or substance classes are generally banned from use in cosmetic products (Article 14 and Annex II CPR). For other substances uses are restricted to specific applications or subject to certain maximum concentrations or other conditions (Annex III CPR). The use of colorants, preservatives and UV filters is governed by positive lists (Annexes IV, V and VI CPR – only substances mentioned therein are permitted for the respectively intended use). In several cases, the Annexes include substance-specific mandatory warnings or instructions for use. All substances which are not expressly governed by cosmetics law are essentially subject to the requirements of Article 3 according to which the products must be safe for human health. Corresponding evidence must be documented in the safety assessment on the respective product.

The declaration of the ingredients of cosmetic products is based on the internationally uniform INCI nomenclature (INCI = International Nomenclature of Cosmetic Ingredients) and is basically made on the packaging, on the container (if there is no packaging) or on a package insert of the product (Article 19.1.g CPR). Source of the INCI designations for the European Union is the “CosIng” database of the European Commission.

In Austria the statutory provisions on cosmetic products are governed by the Food, Safety and Consumer Protection Act (LMSVG) and the associated ordinances (in particular the Cosmetics Ordinance) as well as the Cosmetics Labelling Ordinance based on the Federal Unfair Competition Act (UWG).

In Switzerland cosmetic products are covered by Article 5 Letter b of the Federal Act on Foods and Commodities (LMG). The definition as well as the general conditions to be met by cosmetic products are contained in Article 35 of the Food and Commodities Ordinance (LGV). The implementation provisions are included in the Ordinance of the Swiss Ministry of the Interior on Cosmetic Products (VKos). These provisions are largely identical to the EC Cosmetic Products Regulation. The manufacturing, importing and dispensing of cosmetic products to end-consumers does not require permission by the Federal Health Agency if the products are in conformity with the legislation. Article 23 LMG applies (self-control).

According to German and European law, cosmetic products¹ are exempted from the obligations of labelling under the chemicals legislation and from the submission of safety data sheets (SDS, MSDS). On the European level – as already in earlier chemicals legislation – cosmetic products are exempted from the provisions of the preparation of safety data sheets in accordance with Article 2.6.b of the REACH Regulation.

In accordance with Section 3 of the German Hazardous Substances Ordinance (§§ 6 f.) an employer in whose enterprise cosmetic products are handled must carry out a risk assessment for his employees. The manufacturers of cosmetic products are obliged to make available upon request sufficient information on the safe handling of their products in the professional area. The Group Data Sheets include – in addition to the instructions for use supplied with the products – all necessary additional information for a safe handling of artificial nail products in a professional environment. They are an important tool for the employer in order to meet his duty of assessment in the field of occupational safety in accordance with § 6 Hazardous Substances Ordinance (GefahrstoffVO) and possibly instruct his employees. They should, therefore, be available in every enterprise in which these products are handled. In the event of accidents (e.g. during storage) or inadvertent misuse of a product they can help to take the necessary measures in order to ward off damage from employees and/or customers.

In Austria cosmetic products are likewise exempted from the labelling obligations under chemicals law; the same uniform EU-wide cosmetics regulations apply. Here, too, these Group Data Sheets are an appropriate tool for the employer in order to meet his obligations in accordance with the Employee Protection Act vis a vis the employees in terms of safety, health and risk prevention. Although Switzerland is not a Member State of the EU, it has nonetheless comparable statutory provisions governing this area.

¹In this regard, cosmetic products are defined as products which correspond to the definition mentioned in the EC Cosmetic Products Regulation and which are available in a form and packaging which is dispensed to end-consumers. Cosmetic raw materials, raw material mixtures and bulk ware are hence not covered by this exemption.

The data sheets include

- the product identification (1),
- information on possible hazards (2),
- information on the product composition (3),
- information on first-aid measures in the event of misuse or accident (4),
- information on measures in the event of fire (5),
- information on measures in the event of accidental release and on disposal (6),
- information on handling and storage (7),
- and possibly further safety-relevant information (8).

The data sheets have been prepared according to the current state of knowledge taking into account the products that are currently available on the EU market. If available, the data sheets – in terms of the product composition – are based on the frame formulas which are used within the EC notification portal for cosmetic products (CPNP, status: 2013). The content of this online edition was compiled with the greatest care. IKW, FCIO and SKW cannot, however, take over any liability for the accuracy and completeness of content.

The measures described in the section “First-aid measures” (4) are to be understood as proposals for first-aid measures. They cannot replace emergency medicine in the event of serious health damage, i.e. in the event of misuse or accident. In these cases – particularly if there is a corresponding advice in the respective group data sheet – it is necessary to consult a doctor or the competent Poison Control Centre (see list at the end of this brochure). When contacting the Poison Control Centre or consulting a doctor, the product and/or the packaging or label as well as possible relevant package inserts should be kept available or brought along.

The manufacturers of cosmetic products provide on the packaging and possibly also in package inserts information on the proper and safe use of their products. Many years of experience and careful monitoring of the market show that cosmetic products are safe. The safe application of the products presupposes full compliance with the instructions for use. Serious health issues occur only in extremely rare cases and mostly in conjunction with accidents or misuse. In the event of an inadvertent spillage or leakage of the product (6), not only the necessary measure to protect employees but also the possible risks for the environment need to be considered. It is in particular necessary to ensure an environmentally sound disposal of the absorbed product.

As system providers, the manufacturers of artificial nail products offer a widespread range of products in the sector of nail modelling and other nail care products. They provide as a rule qualified advisory services and offer comprehensive information and education materials to their customers. The publishers of this brochure supply their members constantly with up-to-date information, ensuring that the products are developed according to the latest state of the art.

If there are any queries, concerning e.g. a lack of clarity in respect of the classification of a concrete product under a Group Data Sheet, the manufacturers of the cosmetic products whose address is specified on the packaging can be contacted. Many manufacturers mention, in addition, toll-free service numbers on the packaging which can be called if there are any questions on the product. EU cosmetics legislation prescribes that a manufacturer or importer with registered office in a Member State of the EU must be specified on the packaging.

Information on transport provisions and dangerous goods labelling can be found in the following section.

Industrieverband Körperpflege- und Waschmittel e. V.

The German Cosmetic, Toiletry, Perfumery and Detergent Association

Fachverband der chemischen Industrie Österreichs, Berufsgruppe Waschmittel/Kosmetik

Association of the Austrian Chemical Industry – Detergents and Cosmetics Sector Group

Schweizerischer Kosmetik- und Waschmittelverband

Swiss Cosmetic and Detergent Association

Please note:

“This brochure does not replace in any way whatsoever the obligation to comply with the statutory provisions. The brochure was prepared with the greatest possible care. Nonetheless the authors and the publishers do not take over any liability for the accuracy of information, instructions, advice or possible printing errors. Claims can hence not be asserted against the authors or the publishers based on any possible consequences. This does not apply if the damage has been caused intentionally or in a grossly negligent manner by the publisher or persons performing duties for the latter.”

Information on transport provisions

Cosmetic products, which due to their properties (e.g. flammable liquids) or presentation (aerosol cans), are considered as dangerous goods within the meaning of transport law, are also subject to the provisions on dangerous goods. By way of facilitation for the shipment of these products the so-called “small quantity exceptions” can be applied. These permit for a simplified packaging, labelling and documentation. For the logistic handling the parties involved in transport require the UN number, the respective hazard class and the degree of hazardousness and/or the packing group. These data are made available if necessary by the individual manufacturers for the products concerned. Here, too, no safety data sheets have to be submitted, which would not have any legal basis in dangerous goods law anyway.

For the transport of “dangerous goods” with the different transport modes, provisions apply not only in Europe; some cover also cosmetic products which meet the criteria mentioned below. The corresponding recommendations by the United Nations (UN) have been implemented for instance for the transport by road in the German Dangerous Goods Ordinance Road/Rail/Internal Waterways (GGVSEB), for the transport by sea in the German Dangerous Goods Ordinance Sea (GGVSee), and for air transport in the application of the dangerous goods provisions of the International Air Transport Association (IATA). The national implementation is based on the international rules/conventions for the respective transport mode (Road: ADR, Rail: RID, Sea: IMDG Code, Air: ICAO-TI). The most important provisions can be called up on the website of the Federal Ministry of Transport and digital Infrastructure (BMVI):

http://www.bmvi.de//DE/VerkehrUndMobilitaet/Verkehrspolitik/GueterverkehrUndLogistik/Gefahrgut/gefahrgut_node.html

(The English online versions of ADR 2015 have been posted on the UNECE website:

<http://www.unece.org/trans/danger/publi/adr/adr2015/15contentse.html>)

1. Dangerous goods classes

The United Nations subdivide dangerous goods into 13 different hazard classes and describe in the so-called “Manual of tests and criteria” the test procedures and criteria to determine whether a good to be transported is subject to the regulations. The dangerous goods have to be assigned a registration number (= UN number). All cosmetic products which do not present any properties of such a dangerous goods class are not subject to the provisions on dangerous goods during transport.

- According to the provisions of the United Nations aerosol packages are considered, regardless of the respective propellant, as dangerous goods of Class 2 “Gases”. Due to the classifications in terms of flammability in accordance with Section 31 “Manual of tests and criteria” of the United Nations, they have to be classified in sub-class 2.1 “Flammable gases” or 2.2 “Non-flammable, non-toxic gases”.
- All liquid products whose fillings have a flash point of $\leq 60^{\circ}\text{C}$ (e.g. deodorant atomisers with 45% ethanol) are dangerous goods of Class 3 “Flammable liquids”. However, if the measured flash point exceeds 35°C and the product does not sustain combustion (test method: see 32.5.2 “Manual of tests and criteria”), the product does not have to be classified as dangerous good.
- Solids which contain flammable liquids with a flash point of up to 60°C (e.g. refreshment towels) are classified in Class 4.1 “Flammable solids”. If these towels are, however, packed in sachets which contain in each case less than 10 ml of the flammable liquid and the liquid is fully absorbed, they are exempted from the dangerous goods provisions of all transport modes.
- Hair care/colouring products can meet, depending on their composition, the criteria of Classes 5.1 “Oxidising substances” or 8 “Corrosive substances” (because of the corrosive effect on aluminium!).

– Ingredients of cosmetic products can be classified as “dangerous for the environment”. If quantitative thresholds are exceeded in the preparations, this classification can also apply to products. Products which meet the criteria for the hazard symbol N (dangerous for the environment) would then have to be automatically classified as dangerous goods of Class 9.

2. Exemption for consumers

Cosmetic products which are governed by dangerous goods provisions may be transported by end-consumers after purchasing without application of the provisions. However, taking them along in carry-on luggage is not possible or only possible to a certain extent.

3. Facilitations through limited quantities

Almost all cosmetic products can be transported by the transport modes road/rail/sea in small shipment units of up to 30 kg (or trays of up to 20 kg) based on so-called limited quantity exceptions (Chapter 3.4 ADR/RID/IMDG Code). The advantage is the use of packaging not especially type-approved for dangerous goods shipment and a simplified dangerous goods labelling with a black square on a point, upper and lower corners filled black. Squares on a point with the UN number can be used, according to ADR, until 30.06.2015 at the latest for road transport.

The restriction refers to an admissible size of the respective inner packaging (aerosol packaging e.g. maximum of 1 litre) and the restriction of the finished package to a maximum of 30 kg gross weight (or 20 kg gross weight when using trays). However, there is no limitation of the cargo per pallet, container or vehicle. However, containers, railway wagons and road vehicles have to be labelled with the same symbol in a size of 250 x 250 mm if the cargo exceeds 8 tonnes. This labelling provision does already apply for the first box/tray in case of sea containers or vehicles which are loaded on sea ferries. If in both cases other additional labelling provisions for dangerous goods which are subject to full labelling do apply, shipment units must not be labelled according to the provisions applying for “limited quantities”.

4. Consumer commodities in air transport (ID 8000 IATA-DGR)

Cosmetic products which are classified in the above-mentioned Classes 2 (aerosol packages), 3 and 4.1 can be packed and transported in a simplified manner by aircraft under “ID 8000 Consumer Commodities”. In terms of size, the products are considerably restricted. Packaging must not be type-approved but must resist to the expected strains in air transport. A shipment unit is limited to 30 kg gross. All products are assigned for this type of shipment a specific air registration number (ID 8000) and Class 9. Special reference is made here to training obligations of all those involved in air transport (training with certification, certificate validity of 2 years).

5. Excepted Quantities (Chapter 2.7 IATA-DGR for air transport, otherwise Chapter 3.5 ADR/IMDG Code)

Especially small products (such as testers, promotion articles, nail polishes) can be transported in a considerably simplified manner under this Regulation (even by aircraft). Similar to the limited quantities regulations, the inner receptacles and the quantity per shipment item are limited. The limits are, however, considerably lower (example Class 3, flash point < 23°C: 30 ml per inner packaging, 500 ml per shipment unit). There is no need for type-approved packaging. The structure and quality of the packaging are described in the above-mentioned Chapters of the Regulations. Instead of documentation, a simplified sticker with basic information is used. Only in case of sea transport a complete transport documentation has to be provided. Reference is made to the special training obligations of all those involved in air transport (training with certification, certificate validity of 2 years).

6. Simplifications through exemptions in road transport

If due to the classification of the products or shipment units which are too large the simplifications of the limited quantities provisions cannot be used, shipment units can be handled in a simplified manner up to a certain loaded quantity (e.g. 333 kg for flammable aerosol packages). In this case no trained dangerous goods driver, no vehicle labelling with orange warning plates and no full dangerous goods equipment is necessary (Chapter 1.1.3.6 ADR).

7. Appointment of dangerous goods officers

If companies receive only dangerous goods (e.g. ethanol in tank vehicles) and if the manufactured products are only transported in limited quantities or exempted quantities, the company does not have to appoint a dangerous goods officer. However, if dangerous goods are transported in quantities subject to labelling (such as waste in containers or tanks, bulk goods for filling plants), a dangerous goods officer (EU: safety officer) has to be appointed in the company (§ 1 Dangerous Goods Officer Ordinance and Chapter 1.8 ADR/RID).

8. Security obligations in dangerous goods transport

All employees involved in dangerous goods transport must be sensitised in the prescribed training for the topic "Protection against terrorist attacks of dangerous goods transports". In addition, companies which are involved in the transport of certain goods with a high risk potential (e.g. extremely flammable aerosol propellants and flammable liquids (ethanol!) in tanks) must prepare so-called "Security Plans" (Chapter 1.10 ADR).

Safe handling of cosmetic products at the workplace

The IKW/FCIO/SKW Group Data Sheets apply to all products of a certain product group and constitute a useful addition to the instructions for use which are given on the packaging itself, in package inserts or in information brochures of the individual manufacturers of cosmetic products. With them measures can be taken in the event of inadvertent misuse of a product in order to ward off damage from employees and/or customers.

Every employer must assess the workplace exposure in view of the health risk for every single employee in his operational premises. If necessary, preventive measures in the field of occupational safety have to be taken. Trade supervisory authorities verify compliance with the occupational safety measures. This brochure helps employers to meet these obligations.

An assessment of workplace exposure can, for instance, be based on the following questions:

- What products are used?
- Can the products used constitute a risk for the employees?
- What persons are exposed over what period and how often to the products?
- Is the exposure avoidable? If not, how can it possibly be reduced (e.g. alternation of employees for certain work procedures, wearing of gloves)?

The fundamental assessment of the safety of each cosmetic product is carried out by the manufacturer and does not have to be done by the professional user. All employees must comply with the respective instructions for use and warnings. If necessary, additional technical, organisational or personal protection measures must be taken at the workplace, such as sufficient aeration, if necessary, exhaust hoods (in particular at workplaces where products are mixed or refilled or where dust particles arise during the filing of artificial nails) or the wearing of gloves and/or the use of appropriate skin protection products.

Every employee must be instructed on the basis of a working instruction to be prepared by the employer in a comprehensive manner about all safety and health aspects concerning professional use – including the safe use of cosmetic products and this should be confirmed by signing the corresponding document. More detailed information is included in the German Technical Rules for Hazardous Substances TRGS 530 (“Hair-dressing”, for instance working instruction in Annex 2) as well as also in general TRGS 555 (“Working instruction and information for workers”).

Basic rules for safe working with cosmetic products in hairdresser salons, beauty salons and nail studios

- The instructions for use and possibly warnings of the manufacturer must always be complied with.
- The constant use of specific product groups (e.g. shampoos) can lead, if no protection is afforded, to dryness and soreness of the skin. For that reason suitable protection gloves must be worn and/or skin protection and/or care creams have to be applied.
- A high hygiene standard must be complied with. Workplace hygiene is as a rule subject to specific national hygiene provisions, in Germany to those of the individual Federal States.
- Products whose best before date and/or durability after opening has expired, should no longer be used.
- If not specifically stipulated in the instructions for use, products should never be mixed.
- All containers must immediately be safely resealed after use and unused containers must be stored properly in a sealed condition.
- The proper disposal of unused mixtures and empty containers is to be ensured.
- Spillage/leakage of products must immediately and properly be removed.
- Only emptied aerosol cans should be recycled.
- Do not keep any products in the vicinity of foods or beverages.
- Food or beverage containers may not be used to store cosmetic products.
- Flammable products must not be sprayed on a naked flame or incandescent objects. They are to be kept away from sources of ignition, and smoking is prohibited.
- When handling products which can be inhaled, sufficient ventilation must be ensured.
- Products may only be applied on healthy skin.
- Keep products out of the reach of children.
- Do not wear jewellery. Do not use any utensils which release nickel.
- All escape routes must be kept free.
- In the event of an emergency: call the Poison Control Centre (see list at the end of this brochure) or the emergency number 112 and consult a doctor. Take the packaging, the product and this brochure with you for information for the doctor.

Safe use of artificial nail products

Whoever works as a nail stylist, works with chemical substances. Safe working is of utmost importance in order to protect oneself and one's customers. This brochure is to help in that respect. For safe working with nail styling products, various legal framework conditions have to be complied with, which have already been briefly explained in the Foreword. If you intend to work safely, you must also be informed in a very detailed manner about the properties of the products which are used and you must work carefully at all times. This reduces the possible risks and the occurrence of health problems which can develop if certain substances get more frequently into contact with skin or are inhaled during professional use. This brochure should be within easy reach of every nail stylist. Many questions on safe working with products for (artificial) nail care are answered here. The brochure should, therefore, be carefully read and known to all employees handling these products.

Skin protection

Skin protects the body against damaging external influences. Cosmetic products are safe if they are properly used. A damage of the skin through professional use of nail products can basically be avoided through careful working. Effective measures to protect the skin are described in this brochure. Nonetheless it can never be fully excluded that individual persons react to certain substances such as acrylates with skin problems (irritations or allergies). If such a skin reaction occurs and has not disappeared after a few days, a dermatologist should be consulted to identify the causes, or to find out e.g. by means of a patch test on the back whether an allergic reaction to a certain ingredient exists.

Allergy – important notes on customer advice in the nail studio

Cosmetic products are safe; nonetheless there can be an occurrence of an undesirable effect in your salon in rare cases, e.g. a skin irritation or an allergic reaction for one of your customers. Targeted information for your customers and, more particularly, for allergy sufferers is, therefore, important. Always check with your customer ahead of any treatment whether he/she has ever experienced an allergic reaction against any ingredient contained in artificial nail products and whether those substances are identified within the customer's allergy pass. In this case you should not carry out a treatment with a product which contains the concerned ingredient(s). If, however, during the treatment your customer shows a reaction such as a skin irritation or burning, the product should immediately be removed as rapidly as possible with a cloth and/or by thorough rinsing. In case of doubt, you should recommend to the customer to see a dermatologist. Always inform the manufacturer about any undesirable reactions occurring.

Protection of the respiratory system

Some products contain solvents which volatilise when used and can be inhaled. Also several other ingredients of nail modelling agents can be volatile and be partly released to the air during processing. These vapours can sometimes be smelled (perceived as product odours), but not in all cases, and as a rule they are not visible. The inhalation of these vapours and the inhalation of smallest dust particles which arise during the filing of the (artificial) nails can be damaging to health in the event of intense exposure in a professional environment. For that reason an effective exhaust system should be available at the workplace and an air-conditioning system in the nail studio (for the entire premises). Furthermore, it is recommended to wear a mask during filing. Please note: a mask protects against filing and dust particles arising during the use of powders or the working on artificial nails but does not protect against vapours of solvents.

Composition and technical aspects of nail modelling agents

Typical nail modelling agents consist of methacrylate monomers which are also used for the manufacturing of polymers in dental substances, bone cement, plastics for hearing aids as well as in the printing, coating, leather and textile industry.

Nail modelling agents are offered primarily in two processing systems which are applied in each case after the preparation of the natural nails:

1. a) Self-curing two-component powder/liquid systems
1. b) Light-curing two-component powder/liquid systems
2. Light-curing single component gel systems (composites)

For the two systems quantities of 2 to 4 g are used for the first application and approximately 1 g for filling up after approximately 2 to 3 weeks.

For the two-component systems the curing reaction is triggered by mixing the liquid and the powder. Since the reaction is completed, depending on ambient temperature, after a maximum of 2 to 3 minutes, processing possibilities are strongly limited in time. The reaction occurs with heating and odour development through evaporation in the ambient atmosphere.

For the light-curing gel systems, which constitute a further development of the composites from dental medicine, protected light systems with a weak output are used to avoid skin and/or eye damage. Curing is started after the decomposition of the added photo initiators, and the actual curing process is already completed after 30 to 45 seconds. In practice there is, however, a curing period of 2 to 3 minutes in order to ensure optimum strength and adhesion of the nail.

For the application of the systems there are detailed descriptions which are selectively intended to ensure not only optimum application of the nail modelling but also the highest possible protection of the users.

Without going into the detail of every single step, it is basically part of the preparatory working steps that nails are thoroughly cleaned, disinfected, roughened, degreased and filed and that the nail cuticle is pushed back.

The application of the liquid/powder systems is carried out by means of a special brush, frequently using a template. With the tip of the brush previously immersed in the liquid, the powder is absorbed in a slight circulating movement. This forms a wax-like bead. These and possibly other beads are placed in the centre of the nail and modelled into a slight so-called C curve. The material thickness is selected in such a way that the entire nail modelling has at the so-called stress point a maximum height of 1 mm. For the gel systems the principle is similar, whereby curing by UV light is carried out between the different work steps (gel applications). Filing is then used to optimise the form, polish and in most cases an additional top coat is applied to bring about optimum gloss. If necessary, a filling up of the acrylic modelling is carried out after a few weeks.

Practical information on the safe handling of nail modelling agents

- Work in a clean way: ensure hygiene and cleanliness at your workplace. Clean and disinfect thoroughly and in accordance with the instructions for use all tools and surfaces.
- Wash before and after the treatment not only your own hands but also the hands of the customer. Hand washing is one of the best methods to prevent infections.
- Use a mask and gloves to apply and style the artificial nails.
- Use for every single customer clean (disposable) towels.
- Keep the products cool (not exceeding ambient temperature) in a dry environment and protect them from direct sunlight.
- Ensure good general ventilation and selected exhausts in order to remove filing dust and gaseous product components.
- Only apply the products to healthy and intact nails and surrounding skin areas.
- Make sure that acrylates in liquid form are only applied to the nail itself and not inadvertently to the surrounding skin.

List of Group Data Sheets

**Appendix: Poison Control Centres in Germany, Austria and Switzerland,
in Europe and world-wide**

GROUP DATA SHEET

ACRYLATES: POWDER AND LIQUID SYSTEMS (LIGHT-CURING) – LIQUID

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

Liquid/powder system for the modelling of artificial nails. The liquid is used in combination with the corresponding powder. Exclusively for professional use.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

May be highly flammable (depending on composition).
Causes skin irritation and serious eye irritation.
May cause respiratory irritation.

3. Composition (maximum levels)

Ethyl methacrylate 99 %; ethylene glycol dimethacrylate, phenoxyethyl methacrylate 40 %; isopropyl alcohol, glyceryl dimethacrylate, hydroxylpropyl methacrylate, trimethylene glycol dimethacrylate, N,N-dimethyl-p-toluidine, colouring agents 10 %; diethoxyacetophenone, benzophenone 5 %; hydroquinone methyl ether 0.1 % (legal requirement: max. 0.02 % after mixing).

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.
- Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.
- Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

Apart from water, all common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into the sewer. Mop up main volume with cloths; remove rest with water and common cleaning agent. Dispose of impregnated cloths in accordance with the waste management directives of the municipality. Wear suitable gloves.

Store residual product in the original packaging separately. Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Exclusively for professional use. Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Attacks coated surfaces and rubber.

Store in a sealed manner and keep out of the reach of children. Avoid contact with the eyes and the skin. Availability of an eye rinsing bottle or eye douche is advisable.

Store in a cool (not exceeding room temperature), dark and dry place in the carefully sealed original packaging. Store in a well-ventilated place.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

ACRYLATES: POWDER AND LIQUID SYSTEMS (LIGHT-CURING) – POWDER

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

Liquid/powder system for the modelling of artificial nails. The powder is used in combination with the corresponding liquid. Exclusively for professional use.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Causes skin irritation and serious eye irritation.
May cause respiratory irritation.

3. Composition (maximum levels)

Polyethyl methacrylate, polymethyl methacrylate 95 %; colouring agents 8 %; benzoyl peroxide 2 % (legal requirement: max. 0.7 % after mixing).

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.
- Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.
- Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable. The spreading of the powder during extinguishing in the room is to be prevented.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up carefully with broom. Do not whirl up the powder. Do not wash into the sewer. Remove rest with water and common cleaning agent. Wear suitable protective gloves. Store product residues separately in the original packaging.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Exclusively for professional use. Must be used in accordance with manufacturer's instructions. Observe any warnings on the packaging.

Store in a sealed manner and keep out of the reach of children. Ensure adequate ventilation at the workplace. In order to avoid the inhalation of dust, wear a dust mask.

Store in a cool (not exceeding room temperature), dark and dry place in the carefully sealed original packaging. Store in a well-ventilated place.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

ACRYLATES: POWDER AND LIQUID SYSTEMS – LIQUID

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

Liquid/powder system for the modelling of artificial nails. The liquid is used in combination with the corresponding powder. The reaction begins immediately after the mixing of the liquid with the powder. Exclusively for professional use.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

May be highly flammable (depending on composition).
Causes skin irritation and serious eye irritation.
May cause respiratory irritation.

3. Composition (maximum levels)

Ethyl methacrylate 99 %; trimethacrylate 90 %; 2-hydroxypropyl methacrylate 15 %; tetraethylene glycol dimethacrylate, isopropyl alcohol 10 %; ethylene glycol dimethacrylate 3 %; dimethyl tolylamine 2 %; N,N-dimethyl-p-toluidine 1 %; colouring agents 0.2 %; hydroquinone methylether 0.1 % (legal requirement: max. 0.02 % after mixing).

4. First aid measures

Measures in the event of

GROUP DATA SHEET

ACRYLATES: UV GEL (ADHESION GEL, BUILD-UP GEL, SEALING GEL)

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-17

1. Identification of the product

Acrylate in sticky form of a gel which is applied in one or several layers on the nail plate or the nail tip to form an artificial nail. Exclusively for professional use.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be highly flammable (depending on composition).

Harmful if swallowed. May cause respiratory irritation.

Causes skin irritation and serious eye irritation.

May cause an allergic skin reaction.

3. Composition (maximum levels)

Urethane acrylate oligomers 95 %; 2-hydroxyethyl methacrylate 35 %; triethylene glycol dimethacrylate 32 %; tripropylene glycol diacrylate, methacrylic acid, trimethylolpropane trimethacrylate, trimethylolpropane ethoxytriacrylate, carboxyethyl acrylate, calcium pantothenate 10 %; benzophenone, 1-hydroxycyclohexyl phenyl ketone, 2-hydroxy-2-methylpropiophenone 6 %; acrylic acid ester, acetophenone, isobornyl acrylate 5 %; colouring agents 2 %; hydroquinone, hydroquinone methyl ether 0.02 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.

– Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.

– Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.

– Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into the sewer. Mop up main volume with cloths; remove rest with water and common cleaning agent. Dispose of impregnated cloths in accordance with the waste management directives of the municipality. Wear suitable gloves.

Store residual product in the original packaging separately. Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Exclusively for professional use. Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Attacks coated surfaces and rubber.

Store in a sealed manner and keep out of the reach of children. Avoid contact with the eyes and the skin. Availability of an eye rinsing bottle or eye douche is advisable.

Store in a cool (not exceeding room temperature), dark and dry place in the carefully sealed original packaging. Store in a well-ventilated place.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

ARTIFICIAL NAIL REMOVER/TIP REMOVER

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-02-15

1. Identification of the product

For the removal of artificial nails made of acrylic, gel artificial nails, tips or tip adhesives from natural nails.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Highly flammable.

Harmful if swallowed.

Causes serious eye irritation.

Repeated exposure may cause skin dryness or cracking.

Vapours may cause drowsiness or dizziness.

3. Composition (maximum levels)

Solvents (e.g. ACETONE, BUTYL ACETATE, ETHYL ACETATE, ALCOHOL, ALCOHOL DENAT.) 98 %;
PPG-20 METHYL GLUCOSE ETHER 10 %; PARFUM 2 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.

– Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.

– Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.

– Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Remove rest with water and common cleaning agent. Where suitable wear protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of the reach of children. Avoid contact with eyes and skin.

Store in a cool and dry place (room temperature). Reseal immediately after use.

Product is highly flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

COMBO BAR

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 2.16-2013

1. Identification of the product

Fixed surfactant preparations for skin cleansing.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possibly to commercial uses.

3. Composition (maximum levels)

Soaps (vegetable and tallow base: palm oil, coconut oil, palm kernel oil, tallow and their fatty acids) 85 %; Anionic surfactants (e. g. SODIUM LAURETH SULFATE) 50 %; Emollients, humectants (e.g. GLYCERIN, PROPYLENE GLYCOL) 20 %; Amphoteric / non-ionic surfactants (e.g. BETAINE derivatives) 5 %; Additional ingredients (e.g. plant extracts) 5 %; Skin conditioning agents (e.g. POLYQUATERNIUM-7) 5 %; PARFUM 3 %; Preservatives, antimicrobials 2 %; Colorants 2 %; Opacifier (e.g. TITANIUM DIOXIDE) 2 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the event of babies/infants always consult Poison Control Centre or doctor as a precautionary measure.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

Unused products must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Observe any instructions for use and/or warnings on the packaging.

Avoid contact with the eyes. In the event of frequent professional use of the product and high skin exposure preventive skin protection and the use of skincare products is recommended.

Store in a cool and dry place (room temperature).

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GENERAL PRODUCT INFORMATION

FIBREGLASS ACTIVATOR (PUMP SPRAY OR AEROSOL)

This product is governed by separate legal provisions such as chemicals law and is covered in this publication only for the sake of completeness so that employees in nail studios receive first support for safe working. At any rate the valid specific legal provisions governing this product must be complied with, in particular the possibly existing safety data sheets under chemicals law.

The following information is possibly not complete and/or not valid for all individual products of this product category and only serves, therefore, for general information.

Please observe in each case the specific information provided with the respective product and possibly the safety data sheet and/or request this information from the manufacturer or the person placing the product on the market.

Last modified: 2016-03-18

1. Identification of the product

No cosmetic product. For the accelerated hardening of the adhesive used for fibreglass systems.

2. Hazards identification

Extremely flammable.
Harmful if swallowed. Causes serious eye irritation.
Repeated exposure may cause skin dryness or cracking.
Vapours may cause drowsiness or dizziness.

For aerosols: extremely flammable aerosol. Pressurized container: may burst if heated.

3. Composition (maximum levels)

Heptane 99 %; hexane 90 %; acetone 60 %; isopropyl alcohol 40 %; ethyl acetate 30 %; isobutyl acetate 10 %; N,N-dimethyl-p-toluidine 3 %; alkyl toluidine 1 %.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.
- Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.

– Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

For aerosols: in the event of fire a bursting of the can has to be expected. Persons are to be evacuated from the storage area of aerosols. The fire brigade is to be informed of the presence of aerosols.

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Where suitable wear protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe warnings on packaging.

Keep out of reach of children. Avoid contact with eyes and skin.

Store in a cool and dry place (room temperature). Only use in well-ventilated rooms. Avoid intensive inhalation. Replace cap after use.

For pump sprays:

Danger. Extremely flammable liquid and aerosol. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

For aerosols:

Danger. Extremely flammable aerosol. Pressurized container: may burst if heated. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F. Storage in accordance with TRGS 510 (Technical Rule for Hazardous Substances); for large warehouses (> 30 t liquefied gas) possibly in accordance with the 4th BImSchV (Federal Immission Control Ordinance).

8. Other information

Refer to conditions of use and any warnings on the product or packaging, package insert and/or the safety data sheet.

This product is not subject to cosmetics law and is only mentioned for the sake of completeness in this list.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GENERAL PRODUCT INFORMATION

FIBREGLASS ADHESIVE

This product is governed by separate legal provisions such as chemicals law and is covered in this publication only for the sake of completeness so that employees in nail studios receive first support for safe working. At any rate the valid specific legal provisions governing this product must be complied with, in particular the possibly existing safety data sheets under chemicals law.

The following information is possibly not complete and/or not valid for all individual products of this product category and only serves, therefore, for general information.

Please observe in each case the specific information provided with the respective product and possibly the safety data sheet and/or request this information from the manufacturer or the person placing the product on the market.

Last modified: 2016-03-18

1. Identification of the product

No cosmetic product. Adhesive used for fibreglass systems.

2. Hazards identification

Product may be highly flammable (depending on composition).

Causes skin irritation and serious eye irritation. May cause respiratory irritation.

Contains cyanoacrylate. Danger. Bonds skin and eyes in seconds. Keep out of the reach of children.

3. Composition (maximum levels)

Ethyl cyanoacrylate 95 %; polymethyl methacrylate 15 %; isopropyl cyanoacrylate 10 %.

4. First aid measures

– In the event of inadvertent contact with eyes: if the eyelids stick together or if an eyelid sticks to the eye itself: rinse carefully with warm water and bandage the eye with mull. Consult doctor. Within one to four days the adhesive will dissolve automatically. Do not try to open the eye by force. The self-purifying forces of the eye lead to an improvement over time. If the adhesive is on the eye itself, it will not stick to the eye but will dissolve on its own after a few hours. Due to the strong lacrimal flow in the eye the adhesive is rinsed off automatically.

– In the event of inadvertent ingestion: ingestion is almost impossible but the adhesive can get onto the lips or into the mouth. Try to separate the lips with plenty of warm water. Do not open the lips by force but merely make careful mouth movements. The adhesive solidifies in the mouth and sticks there. Through the effect of the saliva the adhesive dissolves in one to two days. Consult doctor.

– In the event of inadvertent contact with skin. Soak in warm soapy water. Remove contaminated clothing. Peel or roll the adhesive from the skin, if necessary with a blunt object (e.g. a pencil or the handle of a spoon). Do not try to remove the adhesive at one go. Then consult a doctor.

– In the event of intensive inhalation: remove person affected to fresh air. If discomfort persists, consult competent Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: dried adhesives can be scraped off from the corresponding surface.

Store product residues in the original packaging separately. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of reach of children. Avoid contact with skin.

Store in a cool (not exceeding room temperature), dark and dry place. Store in a well-ventilated place. Carefully reseal packaging after use in order to avoid curing of the product.

If highly flammable: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging, package insert and/or the safety data sheet.

This product is not subject to cosmetics law and is only mentioned for the sake of completeness in this list.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GENERAL PRODUCT INFORMATION

HAND DISINFECTION LIQUID

This product is governed by separate legal provisions such as the chemicals law or the biocidal products legislation and is covered in this publication only for the sake of completeness so that employees in nail studios receive first support for safe working. At any rate the valid specific legal provisions governing this product must be complied with, in particular the possibly existing safety data sheets under chemicals law.

The following information is possibly not complete and/or not valid for all individual products of this product category and only serves, therefore, for general information.

Please observe in each case the specific information provided with the respective product and possibly the safety data sheet and/or request this information from the manufacturer or the person placing the product on the market.

Last modified: 2016-03-18

1. Identification of the product

No cosmetic product. Hand disinfection agent.

2. Hazards identification

The product is flammable.

3. Composition (maximum levels)

Ethanol 70 %; water ad 100 %.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult competent Poison Control Centre or doctor. In the case of babies/infants always inform the Poison Control Centre or doctor as a precautionary measure.
- Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.
- Intensive inhalation for aerosols: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre, always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths or mopping up material by controlled disposal – risk of fire. Remove rest with plenty of water. Where appropriate, wear suitable protective gloves.

Packaging should be recycled after residual emptying; minor product residues may be rinsed out. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on the packaging.

Keep out of the reach of children.

Avoid contact with the eyes. Do not apply product to abraded skin.

Keep in a cool and dry place (room temperature). Reseal container after use.

Product is flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging, package insert and/or the safety data sheet.

This product is not subject to cosmetics law and is only mentioned for the sake of completeness in this list.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

LIQUID SOAP

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-02-02

Corresponding frame formulation (CPNP): 2.9-2013

1. Identification of the product

Aqueous to gel-like products containing surfactants for cleansing the body.

NB: liquid "soaps" may be soap based, totally synthetic based or a combination of both soap and synthetic.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possibly to commercial uses.

3. Composition (maximum levels)

Anionic / amphoteric surfactants (e.g. LAURETH SULFATE, BETAINE) 40 %; Non-ionic surfactants (e.g. GLUCOSE derivatives) 40 %; Soaps (sodium, potassium or TRIETHANOLAMINE) 20 %; Emollients (e.g. PEG-7, GLYCERYL COCOATE) 20 %; Humectants (e.g. GLYCERIN, PROPYLENE GLYCOL, SORBITOL) 20 %; Thickeners (e.g. SODIUM CHLORIDE, HYDROXYCELLULOSE derivatives) 5 %; Additional ingredients (e.g. plant extracts, UV filters) 5 %; Pearlescent agents (e.g. GLYCOL DISTEARATE, GLYCOL STEARATE) 5 %; Skin conditioning agents (e.g. cationic CELLULOSE) 5 %; PARFUM 5 %; Preservatives, antimicrobials 2 %; Colorants 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the case of babies/infants always inform the Poison Control Centre or doctor as a precautionary measure.

– Discomfort on contact of undiluted product with skin: immediately wash off with water; skincare. If skin irritation persists, consult doctor.

When consulting a doctor or a Poison Control Centre always keep packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; remove rest with water. Rinse out impregnated cloths with water or dispose of them in accordance with the waste management directives of the municipality.

Packaging should be recycled after residual emptying; minor product residues may be rinsed out. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Avoid contact with the eyes. In the event of frequent professional use of the product and high skin exposure preventive skin protection and the use of skincare products is recommended.

Store in a cool and dry place (room temperature). Reseal container after use.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GENERAL PRODUCT INFORMATION

NAIL ADHESIVE

This product is governed by separate legal provisions such as chemicals law and is covered in this publication only for the sake of completeness so that employees in nail studios receive first support for safe working. At any rate the valid specific legal provisions governing this product must be complied with, in particular the possibly existing safety data sheets under chemicals law.

The following information is possibly not complete and/or not valid for all individual products of this product category and only serves, therefore, for general information.

Please observe in each case the specific information provided with the respective product and possibly the safety data sheet and/or request this information from the manufacturer or the person placing the product on the market.

Last modified: 2016-02-02

1. Identification of the product

No cosmetic agent. Adhesive for the fixing of tips.

2. Hazards identification

Product may be highly flammable (depending on composition).

Causes skin irritation and serious eye irritation. May cause respiratory irritation.

Contains cyanoacrylate. Danger. Bonds skin and eyes in seconds. Keep out of the reach of children.

3. Composition (maximum levels)

Max. 95 % ethyl cyanoacrylate; max. 15 % polymethyl methacrylate, max. 10 % isopropyl cyanoacrylate.

4. First aid measures

– In the event of inadvertent contact with eyes: if the eyelids stick together or if an eyelid sticks to the eye itself: rinse carefully with warm water and bandage the eye with mull. Consult doctor. Within one to four days the adhesive will dissolve automatically. Do not try to open the eye by force. The self-purifying forces of the eye lead to an improvement over time. If the adhesive is on the eye itself, it will not stick to the eye but will dissolve on its own after a few hours. Due to the strong lacrimal flow in the eye the adhesive is rinsed off automatically.

– In the event of inadvertent ingestion: ingestion is almost impossible but the adhesive can get onto the lips or into the mouth. Try to separate the lips with plenty of warm water. Do not open the lips by force but merely make careful mouth movements. The adhesive solidifies in the mouth and sticks there. Through the effect of the saliva the adhesive dissolves in one to two days. Consult doctor.

– In the event of inadvertent contact with skin. Soak in warm soapy water. Remove contaminated clothing. Peel or roll the adhesive from the skin, if necessary with a blunt object (e.g. a pencil or the handle of a spoon). Do not try to remove the adhesive at one go. Then consult a doctor.

– In the event of intensive inhalation: remove person affected to fresh air. If discomfort persists, consult competent Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: dried adhesives can be scraped off from the corresponding surface.

Store product residues in the original packaging separately. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of reach of children. Avoid contact with skin.

Store in a cool (not exceeding room temperature), dark and dry place. Store in a well-ventilated place. Carefully reseal packaging after use in order to avoid curing of the product.

If highly flammable: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging, package insert and/or the safety data sheet.

This product is not subject to cosmetics law and is only mentioned for the sake of completeness in this list.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

NAIL CLEANSER/NAIL DEGREASER/GEL CLEANER

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

For a good adhesion of the nail polish and the artificial nail products to the natural nail, removes the so-called sweat layer.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Highly flammable.

Harmful if swallowed.

Causes serious eye irritation.

Repeated exposure may cause skin dryness or cracking.

Vapours may cause drowsiness or dizziness.

3. Composition (maximum levels)

Isopropyl alcohol, acetone 95 %; propanol, ethyl acetate, n-butyl alcohol 5 %; water ad 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.

– Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.

– Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.

– Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

Suitable extinguishing agents: carbon dioxide, powder extinguishing agents or water in directed spray. Fight larger fires with alcohol-resistant foam or spray water.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Where suitable wear protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of the reach of children. Avoid contact with eyes and skin.

Store in a cool and dry place (room temperature). Reseal immediately after use.

Product is highly flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

NAIL CONDITIONER (OIL-BASED)

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-02-02

Corresponding frame formulation (CPNP): 14.1-2013

1. Identification of the product

Clear, solvent-free products mainly consisting of vegetable oils, fatty acids and proteins for nail care.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possibly to commercial uses.

3. Composition (maximum levels)

Unsaturated fatty acids, proteins, vitamins 10 %; Colorants 1 %; Antioxidants, preservatives, antimicrobials 0.5 %; PARFUM 0.5 %; Vegetable oils (e.g. sesame oil) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; remove rest with plenty of water and common cleaning agent. Dispose of impregnated cloths in accordance with the waste management directives of the municipality.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Store in a cool and dry place (room temperature). Reseal container after use.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

NAIL CUTICLE REMOVER

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-02-08

1. Identification of the product

Clear alkaline solution (pH > 10), in some cases coloured, to soften cuticles (in order to then remove them).

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Harmful if swallowed.

Causes skin irritation and serious eye irritation.

May cause respiratory irritation.

3. Composition (maximum levels)

Hydroxides (e.g. potassium hydroxide) 5 %; Moisturisers, lipid enhancers 30 %; Other excipients (emulsifiers, thickening agents, stabilisers, complexing agents) 5 %; Perfume oils 1 %; Preservatives 1 %; Colouring agents 0.1 %; Water ad 100 %.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately then consult an ophthalmologist.
- Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Then consult Poison Control Centre or doctor as a precautionary measure.
- Discomfort on contact with skin: immediately wash off with plenty of water; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; remove rest with water and common cleaning agent. Dispose of impregnated cloths in accordance with the waste management directives of the municipality. Wear suitable protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Avoid contact with the eyes and the facial skin by all means. Do not apply to abraded skin.

Store in a cool and dry place (room temperature). Reseal container after use.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

NAIL VARNISH

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

Corresponding frame formulation (CPNP): 13.1-2013

1. Identification of the product

Clear or coloured solution consisting of film-forming polymers in organic solvents with the admixture of softeners and thixotropic agents. The product is used to colour nails. A distinction is made between clear/transparent varnish, cream and pearly varnish.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

May be highly flammable (depending on composition).
Causes skin irritation and serious eye irritation.
May cause respiratory irritation.

3. Composition (maximum levels)

Ethanol and/or isopropanol (ALCOHOL, ALCOHOL DENAT., ISOPROPYL ALCOHOL) 90 %; Solvents (e.g. ETHYL ACETATE, BUTYL ACETATE, DIACETONE ALCOHOL, PPG-2 BUTYL ETHER) 90 %; Resins, polymers (e.g. NITROCELLULOSE, ACRYLATES COPOLYMER, PHTHALIC ANHYDRIDE/BUTYL BENZOIC ACID/PROPYLENE GLYCOL COPOLYMER) 50 %; Plasticisers (e.g. TRIETHYL CITRATE) 15 %; Colorants, colour additives (e.g. opacifying / pearlescent agents) 15 %; Additional ingredients (e.g. vitamins, proteins, plant extracts) 10 %; Thickeners (e.g. STEARALKONIUM HECTORITE, SILICA) 5 %; UV filters 2 %.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Then consult a doctor.
- Discomfort on contact with skin: in the event of irritation remove product with nail polish remover; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.

– Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

Suitable extinguishing agents: carbon dioxide, powder extinguishing agents or water in directed spray. Fight larger fires with alcohol-resistant foam or spray water.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Remove rest with water and common cleaning agent. Where suitable wear protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of reach of children. Avoid contact with eyes and skin. Avoid intensive inhalation.

Store in a cool (not exceeding room temperature) and dry place. Carefully reseal after use.

If highly flammable: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

NAIL VARNISH REMOVER

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-02-08

1. Identification of the product

Clear, solvent-containing products for the removal of nail varnish.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Highly flammable.

Harmful if swallowed.

Causes serious eye irritation.

Repeated exposure may cause skin dryness or cracking.

Vapours may cause drowsiness or dizziness.

3. Composition (maximum levels)

Organic solvents (e.g. acetone, ethyl acetate, methoxyisopropanol) 90 %; Other excipients (UV stabilisers, emulsifiers, colouring agents) 6 %; Lipid enhancers 2 %; Perfume 2 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.

– Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.

– Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.

GROUP DATA SHEET

NAIL VARNISH THINNER

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-07

1. Identification of the product

Solvent mixture to dilute thickened nail varnish.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Highly flammable.

Harmful if swallowed.

Causes serious eye irritation.

Repeated exposure may cause skin dryness or cracking.

Vapours may cause drowsiness or dizziness.

3. Composition (maximum levels)

ETHYL ACETATE 80 %; BUTYL ACETATE, ISOPROPYL ALCOHOL 70 %; ACETONE, MEK (methyl ethyl ketone) 40 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.

– Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.

– Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.

– Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

Suitable extinguishing agents: carbon dioxide, powder extinguishing agents or water in directed spray. Fight larger fires with alcohol-resistant foam or spray water.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. GROUP DATA SHEET

NAIL VARNISH: BASE COAT

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

Base coat which serves as basis for the application of the nail varnish.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

May be highly flammable (depending on composition).
Causes skin irritation and serious eye irritation.
May cause respiratory irritation.

3. Composition (maximum levels)

Butyl acetate 50 %; ethyl acetate 30 %; nitrocellulose 20 %; acetyl tributyl citrate 10 %; phthalic acid anhydride/trimellitic acid anhydride/glycol copolymer 10 %; isopropyl alcohol 8 %; colouring agents 4 %; stearalkonium hectorite 3 %; adipic acid/fumaric acid/phthalic acid/tricyclodecane dimethanol copolymer 3 %; citric acid 1%.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Then consult a doctor.
- Discomfort on contact with skin: in the event of irritation remove product with nail polish remover; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.
- Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

Suitable extinguishing agents: carbon dioxide, powder extinguishing agents or water in directed spray. Fight larger fires with alcohol-resistant foam or spray water.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Remove rest with water and common cleaning agent. Where suitable wear protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of reach of children. Avoid contact with eyes and skin. Avoid intensive inhalation.

Store in a cool (not exceeding room temperature) and dry place. Carefully reseal after use.

If highly flammable: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

NAIL VARNISH: RIDGE FILLER

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

Viscose base coat which fills unevenness and ridges in the natural nail.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

May be highly flammable (depending on composition).
Causes skin irritation and serious eye irritation.
May cause respiratory irritation.

3. Composition (maximum levels)

Butyl acetate 50 %; ethyl acetate 30 %; nitrocellulose 20 %; acetyl tributyl citrate 10 %; phthalic acid anhydride/trimellitic acid anhydride/glycol copolymer 10 %; isopropyl alcohol 8 %; colouring agents 4 %; stearalkonium hectorite 3 %; adipic acid/fumaric acid/phthalic acid/tricyclodecane dimethanol copolymer 3 %; citric acid 1%.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Then consult a doctor.
- Discomfort on contact with skin: in the event of irritation remove product with nail polish remover; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.
- Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

Suitable extinguishing agents: carbon dioxide, powder extinguishing agents or water in directed spray. Fight larger fires with alcohol-resistant foam or spray water.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Remove rest with water and common cleaning agent. Where suitable wear protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of reach of children. Avoid contact with eyes and skin. Avoid intensive inhalation.

Store in a cool (not exceeding room temperature) and dry place. Carefully reseal after use.

If highly flammable: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

NAIL VARNISH: TOP COAT

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

(Quick drying) polish to protect the nail varnish.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

May be highly flammable (depending on composition).
Causes skin irritation and serious eye irritation.
May cause respiratory irritation.

3. Composition (maximum levels)

Butyl acetate 50 %; ethyl acetate 30 %; nitrocellulose 20 %; acetyl tributyl citrate 10 %; phthalic acid anhydride/trimellitic acid anhydride/glycol copolymer 10 %; isopropyl alcohol 8 %; colouring agents 4 %; stearalkonium hectorite 3 %; adipic acid/fumaric acid/phthalic acid/tricyclodecane dimethanol copolymer 3 %; citric acid 1%.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Then consult a doctor.
- Discomfort on contact with skin: in the event of irritation remove product with nail polish remover; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.
- Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

Suitable extinguishing agents: carbon dioxide, powder extinguishing agents or water in directed spray. Fight larger fires with alcohol-resistant foam or spray water.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Remove rest with water and common cleaning agent. Where suitable wear protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of reach of children. Avoid contact with eyes and skin. Avoid intensive inhalation.

Store in a cool (not exceeding room temperature) and dry place. Carefully reseal after use.

If highly flammable: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

NAIL WHITE PENCIL

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-08

Corresponding frame formulation (CPNP): 13.2-2013

1. Identification of the product

Product consisting of fillers, colouring agents and bonding agents in the form of a pencil to colour the underside of the nail.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possibly to commercial uses.

3. Composition (maximum levels)

Bulking agents (e.g. KAOLIN, MAGNESIUM CARBONATE, chalk) 80 %; Colorants, colour additives (e.g. opacifying agents / TITANIUM DIOXIDE) 30 %; Binding agents (e.g. waxes, STEARIC ACID) 25 %; Thickeners (e.g. BENTONITE) 5 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

Unused products must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Observe any instructions for use and/or warnings on the packaging.

Store in a cool and dry place (room temperature).

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

PETROLEUM JELLY

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-08

Corresponding frame formulation (CPNP): 1.15-2013

1. Identification of the product

Pasty skin care product based on petroleum jelly.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possibly to commercial uses.

3. Composition (maximum levels)

PETROLATUM 100 %; PARFUM 0.5 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; remove rest with plenty of water and common cleaning agent. Dispose of impregnated cloths in accordance with the waste management directives of the municipality.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Store in a cool and dry place (room temperature). Reseal container after use.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

PRIMER/ADHESION PROMOTER – ACID-FREE

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

For the preparation of the natural nail (polarisation), supports good adhesion of the artificial nail to the natural nail; does not contain methacrylic acid.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be highly flammable (depending on composition).
Causes severe skin burns and eye damage.
May cause serious and permanent damage to mouth, neck or stomach.
May cause respiratory irritation.
Vapours may cause drowsiness or dizziness.

3. Composition (maximum levels)

Ethyl acetate, acetone 95 %; methacryloxyethyl malonate 30 %; butyl acetate 35 %; ethyl methacrylate 20 %; isopropyl alcohol, isobutyl methacrylate 5 %.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.
- Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.
- Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

Suitable extinguishing agents: carbon dioxide, powder extinguishing agents or water in directed spray. Fight larger fires with alcohol-resistant foam or spray water.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Remove rest with water and common cleaning agent. Where suitable wear protective gloves.

Store residual product in the original packaging separately. Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of reach of children. Reseal container after use. Avoid contact with eyes and skin.

Store in a cool (not exceeding room temperature), dark and dry place. Store in a well-ventilated place. During storage pressure can develop in the container. Always open container, therefore, carefully.

If highly flammable: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

QUICK DRYING SPRAY (AEROSOL)

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

Drying spray to accelerate nail sticking.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Causes serious eye irritation.
Repeated exposure may cause skin dryness or cracking.
Vapours may cause drowsiness or dizziness.

Extremely flammable aerosol. Pressurized container: may burst if heated.

3. Composition (maximum levels)

Dimethicone, MEK (methyl ethyl ketone) 75 %; propane, butane, isobutane, ethanol 60 %.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.
- Discomfort on contact with skin: immediately wash off with plenty of water and soap; skincare. If skin irritation persists, consult doctor.
- Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or Poison Control Centre, always have packaging or label and possibly package insert available.

5. Fire fighting measures

In the event of fire a bursting of the can has to be expected. Persons are to be evacuated from the storage area of aerosols. The fire brigade is to be informed of the presence of aerosols.

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

Recycle only emptied aerosol cans. Filled unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe warnings on packaging: Danger. Extremely flammable aerosol. Pressurized container: may burst if heated.

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F. Keep out of reach of children.

Do not spray into eyes. Avoid intensive inhalation. Ensure sufficient ventilation and venting.

Store in a cool and dry place (room temperature). Replace cap after use.

Storage in accordance with TRGS 510 (Technical Rule for Hazardous Substances); for large warehouses (> 30 t liquefied gas) possibly in accordance with the 4th BImSchV (Federal Immission Control Ordinance).

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

QUICK DRYING SPRAY (PUMP SPRAY)

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

Drying spray to accelerate nail sticking.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Highly flammable. Extremely flammable aerosol.
Causes serious eye irritation.
Repeated exposure may cause skin dryness or cracking.
Vapours may cause drowsiness or dizziness.

3. Composition (maximum levels)

Solvents (e.g. dimethicone, acetone, ethyl acetate) 100 %.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.
- Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.
- Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Where suitable wear protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe warnings on packaging: Danger. Extremely flammable aerosol.

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F. Keep out of reach of children.

Do not spray into eyes. Avoid intensive inhalation. Ensure sufficient ventilation and venting.

Store in a cool and dry place (room temperature). Replace cap after use.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CARE (SILICONE BASED)

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 1.14-2013

1. Identification of the product

Oily product based on silicones containing active ingredients for skin care.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be flammable.

3. Composition (maximum levels)

Silicones including volatile silicones (e.g. CYCLOPENTASILOXANE, DIMETHICONE) 90 %; Emollients (e.g. SQUALANE) 25 %; Additional ingredients (e.g. vitamins, plant extracts) 10 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths and mopping up material by controlled disposal – possible risk of fire. Remove rest with plenty of water and common cleaning agent.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Store in a cool and dry place (room temperature). Reseal container after use.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CARE CREAM, LOTION, GEL

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 1.1-2013

1. Identification of the product

Emulsions or gels with active ingredients for skin care.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be flammable.

3. Composition (maximum levels)

Oils (e.g. vegetable and/or mineral), waxes and fats (e.g. long-chain alcohols) 30 %; Silicones including volatile silicones (e.g. CYCLOPENTASILOXANE, DIMETHICONE) 20 %; Humectants (e.g. GLYCERIN, PROPYLENE GLYCOL, PEG) 20 %; Thickeners (e.g. CARBOMER, XANTHAN GUM) 12 %; Ethanol (ALCOHOL, ALCOHOL DENAT.) 10 %; Additional ingredients (e.g. vitamins, antioxidants, plant extracts) 10 %; Bulking agents (e.g. TALC, SILICA, nylon powder) 5 %; UV filters 5 %; Emulsifying agents, anionic / amphoteric / non-ionic surfactants (e.g. PEG stearate, cetareth) 5 %; Preservatives, antimicrobials 2 %; Colorants 2 %; PARFUM 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths and mopping up material by controlled disposal – possible risk of fire. Remove rest with plenty of water and common cleaning agent.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Store in a cool and dry place (room temperature). Reseal container after use.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CARE CREAM, LOTION, GEL – WITH HIGH LEVEL OF BULKING AGENTS

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 1.4-2013

1. Identification of the product

Emulsions or gels with a high level of bulking agents and active ingredients for skin care.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be flammable.

3. Composition (maximum levels)

Oils (e.g. vegetable and/or mineral), waxes and fats (e.g. long-chain alcohols) 60 %; Thickeners (e.g. BENTONITE, CARBOMER, CELLULOSE) 60 %; Humectants (e.g. GLYCERIN, PROPYLENE GLYCOL) 40 %; Bulking agents (e.g. starch, ZINC OXIDE, KAOLIN) 40 %; Emulsifying agents, anionic / amphoteric / non-ionic surfactants (e.g. GLYCERYL STEARATE, SODIUM LAURETH SULFATE) 25 %; Ethanol (ALCOHOL, ALCOHOL DENAT.) 20 %; Silicones including volatile silicones (e.g. CYCLOPENTASILOXANE, DIMETHICONE) 20 %; UV filters 5 %; Additional ingredients (e.g. plant extracts, antioxidants, chelating agents) 5 %; Preservatives, antimicrobials 2 %; Colorants 2 %; PARFUM 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths and mopping up material by controlled disposal – possible risk of fire. Remove rest with plenty of water and common cleaning agent.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Store in a cool and dry place (room temperature). Reseal container after use.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CARE CREAM, LOTION, GEL – WITH HIGH LEVEL OF FATTY COMPOUNDS

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 1.5-2013

1. Identification of the product

Emulsions or gels with a high level of fatty compounds and active ingredients for skin care.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be flammable.

3. Composition (maximum levels)

Oils (e.g. vegetable and/or mineral), waxes and fats (e.g. long-chain alcohols) 95 %; Humectants (e.g. GLYCERIN, PROPYLENE GLYCOL, PEG) 25 %; Ethanol (ALCOHOL, ALCOHOL DENAT.) 25 %; Silicones including volatile silicones (e.g. CYCLOPENTASILOXANE, DIMETHICONE) 20 %; Emulsifying agents, anionic / amphoteric / non-ionic surfactants (e.g. GLYCERYL STEARATE, PEG stearate) 15 %; Thickeners (e.g. CARBOMER, XANTHAN GUM) 12 %; Bulking agents (e.g. TALC, SILICA, ZINC OXIDE, nylon powder) 10 %; Additional ingredients (e.g. vitamins, antioxidants, plant extracts) 10 %; Cationic polymers (e.g. POLYQUATERNIUM-7, POLYQUATERNIUM-24) 5 %; UV filters 5 %; PARFUM 5 %; Preservatives, antimicrobials 2 %; Colorants 2 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths and mopping up material by controlled disposal – possible risk of fire. Remove rest with plenty of water and common cleaning agent.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Store in a cool and dry place (room temperature). Reseal container after use.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CARE CREAM, LOTION, GEL – WITH HIGH LEVEL OF HUMECTANTS

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 1.3-2013

1. Identification of the product

Emulsions or gels with a high level of humectants and active ingredients for skin care.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be flammable.

3. Composition (maximum levels)

Humectants (e.g. GLYCERIN, PROPYLENE GLYCOL, PEG) 50 %; Oils (e.g. vegetable and/or mineral), waxes and fats (e.g. long-chain alcohols) 40 %; Silicones including volatile silicones (e.g. CYCLOPENTASILOXANE, DIMETHICONE) 20 %; Ethanol (ALCOHOL, ALCOHOL DENAT.) 20 %; Emulsifying agents, anionic / amphoteric / non-ionic surfactants (e.g. GLYCERYL STEARATE, SODIUM COCOYL ISETHIONATE) 10 %; Bulking agents (e.g. SILICA, TALC) 10 %; UV filters 5 %; Film forming polymers (e.g. PVP) 5 %; Additional ingredients (e.g. vitamins, plant extracts) 5 %; Thickeners (e.g. CARBOMER) 5 %; Preservatives, antimicrobials 2 %; Colorants 2 %; PARFUM 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths and mopping up material by controlled disposal – possible risk of fire. Remove rest with plenty of water and common cleaning agent.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Store in a cool and dry place (room temperature). Reseal container after use.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CARE CREAM, LOTION, GEL – WITH HIGH LEVEL OF SILICONES

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 1.2-2013

1. Identification of the product

Emulsions or gels with a high level of silicones and active ingredients for skin care.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be flammable.

3. Composition (maximum levels)

Silicones including volatile silicones (e.g. CYCLOPENTASILOXANE, DIMETHICONE) 50 %; Oils (e.g. vegetable and/or mineral), waxes and fats (e.g. long-chain alcohols) 40 %; Ethanol (ALCOHOL, ALCOHOL DENAT.) 25 %; Humectants (e.g. GLYCERIN, PROPYLENE GLYCOL, PEG) 20 %; Additional ingredients (e.g. plant extracts, vitamins) 10 %; Bulking agents (e.g. starch, KAOLIN, TALC) 5 %; Emulsifying agents, anionic / amphoteric / non-ionic surfactants (e.g. SORBITAN SESQUIOLEATE, SORBITAN STEARATE) 5 %; Thickeners (e.g. CELLULOSE GUM) 5 %; UV filters 5 %; Preservatives, antimicrobials 2 %; Colorants 2 %; PARFUM 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths and mopping up material by controlled disposal – possible risk of fire. Remove rest with plenty of water and common cleaning agent.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Store in a cool and dry place (room temperature). Reseal container after use.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CLEANSING CREAM, LOTION, SCRUB, GEL

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 2.6-2013

1. Identification of the product

Aqueous or aqueous-alcoholic surfactant-containing emulsions, in some cases perfumed, for cleansing the face and in some cases for skin scrub.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be flammable.
May cause serious eye irritation.

3. Composition (maximum levels)

Oils (e.g. vegetable and/or mineral), waxes and fats (e.g. long-chain alcohols) 95 %; Humectants (e.g. GLYCERIN, PROPYLENE GLYCOL, PEG) 25 %; Anionic / amphoteric / non-ionic surfactants (e.g. SODIUM COCOYL ISETHIONATE, SODIUM LAURETH SULFATE) 25 %; Ethanol (ALCOHOL, ALCOHOL DENAT.) 25 %; Silicones including volatile silicones (e.g. CYCLOPENTASILOXANE, DIMETHICONE) 20 %; Thickeners (e.g. CARBOMER, XANTHAN GUM) 12 %; Bulking agents (e.g. TALC, SILICA, ZINC OXIDE, nylon powder) 10 %; Abrasives (e.g. POLYETHYLENE, walnuts) 10 %; Additional ingredients (e.g. vitamins, antioxidants, plant extracts) 10 %; Cationic polymers (e.g. POLYQUATERNIUM-7, POLYQUATERNIUM-24) 5 %; PARFUM 5 %; Preservatives, antimicrobials 2 %; Colorants 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.
- Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the case of babies/infants always inform the Poison Control Centre or doctor as a precautionary measure.

– Discomfort on contact of undiluted product with skin: immediately wash off with water; skincare. If skin irritation persists, consult doctor.

When consulting a doctor or a Poison Control Centre always keep packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths and mopping up material by controlled disposal – possible risk of fire. Remove rest with plenty of water and common cleaning agent.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Avoid contact with the eyes.

Store in a cool and dry place (room temperature). Reseal container after use.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CLEANSING FOAM

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-02-16

Corresponding frame formulation (CPNP): 2.1-2013

1. Identification of the product

Aqueous, easy foaming, surfactant containing product for cleansing the skin. Often in pump foamer packs.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possibly to commercial uses.

3. Composition (maximum levels)

Anionic surfactants (e.g. SODIUM LAURETH SULFATE) 40 %; Oils (e.g. vegetable and/or mineral), waxes and fats (e.g. long-chain alcohols) 30 %; Amphoteric / non-ionic surfactants (e.g. ethoxylated sorbitan esters) 20 %; Humectants (e.g. GLYCERIN, PROPYLENE GLYCOL, SORBITOL) 20 %; Abrasives (e.g. POLYETHYLENE, walnuts) 10 %; Silicones including volatile silicones (e.g. CYCLOPENTASILOXANE, DIMETHICONE) 5 %; Thickeners (e.g. HYDROXYETHYLCELLULOSE) 5 %; Additional ingredients (e.g. plant extracts, vitamins) 5 %; PARFUM 3 %; Preservatives, antimicrobials 2 %; Colorants 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the case of babies/infants always inform the Poison Control Centre or doctor as a precautionary measure.

– Discomfort on contact of undiluted product with skin: immediately wash off with water; skincare. If skin irritation persists, consult doctor.

When consulting a doctor or a Poison Control Centre always keep packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; remove rest with water. Rinse out impregnated cloths with water or dispose of them in accordance with the waste management directives of the municipality.

Packaging should be recycled after residual emptying; minor product residues may be rinsed out. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Avoid contact of undiluted product with eyes.

Store in a cool and dry place (room temperature). Reseal container after use.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CLEANSING FOAM, WITH HIGH LEVEL OF OILS AND/OR HUMECTANT

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-02-16

Corresponding frame formulation (CPNP): 2.2-2013

1. Identification of the product

Easy-foaming, surfactant-containing product with a high level of oils and humectants for cleansing the skin. Often offered in pump foamer packs.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possibly to commercial uses.

3. Composition (maximum levels)

Oils (e.g. vegetable and/or mineral), waxes and fats (e.g. long-chain alcohols) 50 %; Humectants (e.g. GLYCERIN, PROPYLENE GLYCOL) 50 %; Anionic surfactants (e.g. SODIUM LAURETH SULFATE, DISODIUM LAURETH SULFOSUCCINATE) 30 %; Non-ionic / amphoteric surfactants (e.g. CETETH-20, ethoxylated long-chain alcohols) 20 %; Silicones including volatile silicones (e.g. CYCLOPENTASILOXANE, DIMETHICONE) 20 %; Abrasives (e.g. POLYETHYLENE, walnuts) 10 %; Thickeners (e.g. CARBOMER) 6 %; Additional ingredients (e.g. pearlescent agents such as GLYCOL DISTEARATE) 5 %; Preservatives, antimicrobials 2 %; PARFUM 1 %; Colorants 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the case of babies/infants always inform the Poison Control Centre or doctor as a precautionary measure.

– Discomfort on contact of undiluted product with skin: immediately wash off with water; skincare. If skin irritation persists, consult doctor.

When consulting a doctor or a Poison Control Centre always keep packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; remove rest with water. Rinse out impregnated cloths with water or dispose of them in accordance with the waste management directives of the municipality.

Packaging should be recycled after residual emptying; minor product residues may be rinsed out. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Avoid contact of undiluted product with eyes.

Store in a cool and dry place (room temperature). Reseal container after use.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CLEANSING GEL (GENTLE)

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 2.5-2013

1. Identification of the product

Aqueous, surfactant-containing gel for gentle skin cleansing with extra mild surfactants.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possibly to commercial uses.

3. Composition (maximum levels)

Anionic surfactants (e.g. SODIUM LAUROYL SARCOSINATE, DISODIUM LAURETH SULFOSUCCINATE) 20 %; Oils (e.g. vegetable and/or mineral), waxes and fats (e.g. long-chain alcohols) 20 %; Humectants (e.g. GLYCERIN, PROPYLENE GLYCOL) 20 %; Non-ionic / amphoteric surfactants (e.g. BETAINE derivatives, GLUCOSE derivatives) 15 %; Silicones including volatile silicones (e.g. CYCLOPENTASILOXANE, DIMETHICONE) 10 %; Foam boosting agents (e.g. COCAMIDE MEA) 5 %; Additional ingredients (e.g. pearlescent agents, plant extracts) 5 %; Thickeners (e.g. HYDROXYPROPYL METHYLCELLULOSE) 5 %; Preservatives, antimicrobials 2 %; PARFUM 1 %; Colorants 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the case of babies/infants always inform the Poison Control Centre or doctor as a precautionary measure.

– Discomfort on contact of undiluted product with skin: immediately wash off with water; skincare. If skin irritation persists, consult doctor.

When consulting a doctor or a Poison Control Centre always keep packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; remove rest with water. Rinse out impregnated cloths with water or dispose of them in accordance with the waste management directives of the municipality.

Packaging should be recycled after residual emptying; minor product residues may be rinsed out. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Avoid contact of undiluted product with eyes.

Store in a cool and dry place (room temperature). Reseal container after use.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CLEANSING PRODUCT (PASTY), WITH OR WITHOUT ABRASIVES

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

1. Identification of the product

Pasty to solid, partly coloured aqueous surfactant preparations for skin cleansing with abrasives.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

May cause serious eye irritation.

3. Composition (maximum levels)

Surfactants 30 %; Natural or plastic scrubbing agents 25 %; Other ingredients (e.g. lipid enhancers, opacifiers and pearlescent agents) 10 %; Polymers and thickening agents 5 %; Special care substances (e.g. vitamins, amino acids, moisturising agents, plant extracts) 5 %; Complexing agents 1 %; Perfume oils 1 %; Preservatives 1 %; Antimicrobials 1 %; Colouring agents 0.1 %; Water ad 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the case of babies/infants always inform the Poison Control Centre or doctor as a precautionary measure.

– Discomfort on contact of undiluted product with skin: immediately wash off with water; skincare. If skin irritation persists, consult doctor.

When consulting a doctor or a Poison Control Centre always keep packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; remove rest with water. Rinse out impregnated mopping up material with water or dispose of it in accordance with the waste management directives of the municipality. Where appropriate, wear suitable protective gloves.

Packaging should be recycled after residual emptying; minor product residues may be rinsed out. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Avoid contact with the eyes. In the event of frequent professional use of the product and high skin exposure preventive skin protection and the use of skincare products is recommended.

Store in a cool and dry place (room temperature). Reseal container after use.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN CLEANSING PRODUCT, WITH SOLVENTS AND/OR ABRASIVES

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

1. Identification of the product

Liquid to pasty surfactant preparations for skin cleansing with solvents and/or abrasives to remove persistent dirt or staining.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be flammable.
May cause serious eye irritation.

3. Composition (maximum levels)

Solvents (e.g. ester oils) 70 %; Surfactants 30 %; Natural or plastic scrubbing agents 25 %; Other ingredients (e.g. lipid enhancers, opacifiers and pearlescent agents) 10 %; Polymers and thickening agents 5 %; Special care substances (e.g. vitamins, amino acids, moisturising agents, plant extracts) 5 %; Complexing agents 1 %; Perfume oils 1 %; Preservatives 1 %; Antimicrobials 1 %; Colouring agents 0,1 %; Water ad 100 %.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.
- Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the case of babies/infants always inform the Poison Control Centre or doctor as a precautionary measure.
- Discomfort on contact of undiluted product with skin: immediately wash off with water; skincare. If skin irritation persists, consult doctor.

When consulting a doctor or a Poison Control Centre always keep packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths or mopping up material by controlled disposal – risk of fire. Remove rest with plenty of water and common cleaning agent. Where appropriate, wear suitable protective gloves.

Packaging should be recycled after residual emptying; minor product residues may be rinsed out. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Avoid contact with the eyes. In the event of frequent professional use of the product and high skin exposure preventive skin protection and the use of skincare products is recommended.

Store in a cool and dry place (room temperature). Reseal container after use.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN GEL (HYDRO-ALCOHOLIC)

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 1.9-2013

1. Identification of the product

Hydro-alcoholic gel with active ingredients for skin care.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be flammable.

3. Composition (maximum levels)

Ethanol and/or isopropanol (ALCOHOL, ALCOHOL DENAT., ISOPROPYL ALCOHOL) 70 %; Emollients, humectants (e.g. PROPYLENE GLYCOL, GLYCERIN) 20 %; Additional ingredients (e.g. vitamins, plant extracts) 10 %; Emulsifying agents, anionic / amphoteric / non-ionic surfactants (e.g. fatty acid polyglycolethers) 6 %; Thickeners (e.g. CARBOMER) 5 %; Preservatives, antimicrobials 3.5 %; Colorants 1 %; PARFUM 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the event of babies/infants always consult Poison Control Centre or doctor as a precautionary measure.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths and mopping up material by controlled disposal – possible risk of fire. Remove rest with plenty of water and common cleaning agent.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Store in a cool and dry place (room temperature). Reseal container after use.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SKIN PROTECTION CREAM, LOTION, FLUID AND GEL

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

1. Identification of the product

Products consisting of various fats, oils and waxes, possibly with pigments, also fat-free gels, with different active ingredients, partly perfumed, for skin protection and skin care.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Product may be flammable.

3. Composition (maximum levels)

Waxes, oils and fats 99 %; Moisturising agents and skin care substances 50 %; Pigments 25 %; Emulsifiers 25 %; Ethanol 25 %; Conditioning agents 20 %; Surfactants 20 %; UV filters 15 %; Polymers and thickening agents 12 %; Other active ingredients (e.g. plant extracts, vitamins, tannins) 10 %; Other ingredients 5 %; Perfume oils 1 %; Preservatives 1 %; Water ad 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths and mopping up material by controlled disposal – possible risk of fire. Remove rest with plenty of water and common cleaning agent.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Store in a cool and dry place (room temperature). Reseal container after use.

Product may be flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SOAP – TOILET

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 2.8-2013

1. Identification of the product

Solid product mainly consisting of sodium/potassium salts of natural fatty acids for cleansing the body.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possibly to commercial uses.

3. Composition (maximum levels)

Soap (e.g. saponified vegetable oil, tallow fatty acids) 99 %; GLYCERIN 20 %; Emollients, humectants (e.g. PROPYLENE GLYCOL) 10 %; Amphoteric / anionic surfactants (e.g. COCAMIDOPROPYL BETAINE) 5 %; Oils (e.g. vegetable and/or mineral) 5 %; PARFUM 5 %; Colorants 2.5 %; TITANIUM DIOXIDE 2 %; Cationic polymers (e.g. POLYQUATERNIUM-7) 2 %; Additional ingredients (e.g. plant extracts) 2 %; Preservatives, antimicrobials, antioxidants, chelating agents 1 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the event of babies/infants always consult Poison Control Centre or doctor as a precautionary measure.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

Unused products must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Observe any instructions for use and/or warnings on the packaging.

Avoid contact with the eyes. In the event of frequent professional use of the product and high skin exposure preventive skin protection and the use of skincare products is recommended.

Store in a cool and dry place (room temperature).

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

SYNDET BAR

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-10

Corresponding frame formulation (CPNP): 2.15-2013

1. Identification of the product

Fixed surfactant preparations for skin cleansing.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possibly to commercial uses.

3. Composition (maximum levels)

Anionic / nonionic / amphoteric surfactants (e.g. SODIUM LAURETH SULFATE, ethoxylated long-chain alcohols, BETAINE derivatives) 70 %; Plasticisers, binders, emollients (GLYCERIN, PROPYLENE GLYCOL) 50 %; Fillers (e.g. TALC, KAOLIN, starch) 30 %; Additional ingredients (e.g. plant extracts) 5 %; Skin conditioning agents (e.g. POLYQUATERNIUM-7) 5 %; PARFUM 2 %; TITANIUM DIOXIDE 2 %; Colorants 2 %; Preservatives, antimicrobials 2 %; Chelating agents 1 %; Opacifying agents 0.5 %; AQUA (water) to 100 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; if irritation persists, consult ophthalmologist as a precautionary measure.

– Inadvertent ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one glass of water. Where appropriate, consult Poison Control Centre or doctor. In the event of babies/infants always consult Poison Control Centre or doctor as a precautionary measure.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

Unused products must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Observe any instructions for use and/or warnings on the packaging.

Avoid contact with the eyes. In the event of frequent professional use of the product and high skin exposure preventive skin protection and the use of skincare products is recommended.

Store in a cool and dry place (room temperature).

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GROUP DATA SHEET

TIP BLENDER

Please never pass on this group data sheet alone but always together with the corresponding general information and the attached list of Poison Control Centres.

Last modified: 2016-03-18

1. Identification of the product

To mask the transition from the natural nail to the plastic tip.

2. Hazards identification

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Highly flammable.

Harmful if swallowed.

Causes serious eye irritation.

Repeated exposure may cause skin dryness or cracking.

Vapours may cause drowsiness or dizziness.

3. Composition (maximum levels)

Acetone, ethanol, isopropyl alcohol 80 %; ethyl acetate, butyl acetate 25 %.

4. First aid measures

Measures in the event of

– Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.

– Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.

– Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.

– Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Where suitable wear protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of the reach of children. Avoid contact with eyes and skin.

Store in a cool and dry place (room temperature). Reseal immediately after use.

Product is highly flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

For contact data of the Poison Control Centres in Germany, Austria and Switzerland, see Appendix.

GENERAL PRODUCT INFORMATION

WORKBENCH AND TOOL CLEANING PRODUCT

This product is governed by separate legal provisions such as chemicals law and is covered in this publication only for the sake of completeness so that employees in nail studios receive first support for safe working. At any rate the valid specific legal provisions governing this product must be complied with, in particular the possibly existing safety data sheets under chemicals law.

The following information is possibly not complete and/or not valid for all individual products of this product category and only serves, therefore, for general information.

Please observe in each case the specific information provided with the respective product and possibly the safety data sheet and/or request this information from the manufacturer or the person placing the product on the market.

Last modified: 2016-03-18

1. Identification of the product

No cosmetic product. Agent to clean tools and work table.

2. Hazards identification

Highly flammable.
Harmful if swallowed.
Causes serious eye irritation.
Repeated exposure may cause skin dryness or cracking.
Vapours may cause drowsiness or dizziness.

3. Composition (maximum levels)

95 % Isopropyl alcohol 95 %; acetone, ethanol 75 %; MEK (methyl ethyl ketone), ethyl acetate 25 %.

4. First aid measures

Measures in the event of

- Inadvertent contact with eyes: rinse thoroughly with plenty of lukewarm water immediately; then consult ophthalmologist.
- Inadvertent ingestion: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Then consult doctor.
- Discomfort on contact with skin: immediately wash off with water and soap; skincare. Remove contaminated clothing and towels. If skin irritation persists, consult doctor.

– Intensive inhalation: remove person affected to fresh air; if discomfort persists, consult Poison Control Centre or doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

5. Fire fighting measures

All common extinguishing agents are suitable.

6. Accidental release measures; disposal considerations

In the event of spillage/leakage: do not wash into sewer. Mop up with moisture-sealing material (e.g. kieselguhr); when larger amounts are involved, dispose of cloths or mopping up material by controlled waste disposal – risk of fire. Where suitable wear protective gloves.

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

7. Handling and storage

Must be used in accordance with manufacturer's instructions. Observe any warnings on packaging.

Keep out of the reach of children. Avoid contact with eyes and skin.

Store in a cool and dry place (room temperature). Reseal immediately after use.

Product is highly flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

8. Other information

Refer to conditions of use and any warnings on the product or packaging, package insert and/or the safety data sheet.

This product is not subject to cosmetics law and is only mentioned for the sake of completeness in this list.
